Numb. 2124

The London Gazette.

Published by Authority.

From Thursday March 25. to Monday March 29. 1686.

Naples, March 5.

COlonel *Vespasiano* has already raised 300 Men in this Kingdom for the Service of the Republick of *Venice*, (which he has sent to the *Levant*) and hopes before the end of this month to have quite finished the Levy he is to make for that State.

Genoua, March 9. We have an account from *Leghorne*, that six Gallies, and three Galiots, are fitting out there with great diligence, which are to serve with the Pope's Gallies, and those of *Malta*, against the *Turks*. By a Vessel arrived from *Cadiz*, we are informed, that Sixteen *Spanish* Men of War are ordered to go and meet the Galeons that are expected home in *June* next. The Letters from *Provence* confirm that the *French* Gallies are fitting at *Marseilles*, and a Squadron of Men of War at *Toulon*, which are to join together under the Command of the Duke *de Mortemar*. The Sieur *d'Obbeville*, Envoy from *France*, had this week Audience of the Doge, but we do not know the Subject of it. The Master of a Vessel which arrived here this week from *Corfou*, assures us, that the *Venetian* Fleet would be ready to sail from thence before the end of this Month, and that it was believed the Captain-General would begin the Campagne with the Siege of *Modon* or *Larta*. The Advices from the *Levant* say the *Turks* make great Preparations for the Campagne in *Hungary*. The Count *de Fuensalida* is expected here the next Month from *Sardinia*, in his way to *Milan*; and in the mean time the Palace of Prince *Doria* is preparing for him.

Venice, March 15. By a Vessel which came lately from *Zara*, we are informed, that before her departure from thence, several Galeasses arrived there from *Corfou*, to take on Board the *Venetian* Troops that have had their Winter-quarters on that side. And by Letters of the 30th of the last Month from *Corfou* we are informed, that the Captain-General hath sent a Squadron of Men of War to Cruise in the *Archipelago*, under the command of Signior *Pisani*, and that he would part from hence himself with the whole Fleet, so soon as the great Convoy he expected from hence was arrived there. On *Thursday* last Count *Coningsmarke*, General of the Forces of this State by Land, had Audience of the Senate: He will part from hence very suddenly for the *Levant*. The Troops of the *Milaneze* are embarqued; and those of *Hanouer* are expected at the *Lido* before the end of this Month. On Monday last arrived here a Barque from *Spalatro*, with advice, that the Sangiac of *Albania* having assembled what Troops he could, was marched with them towards *Pastrorith* with design, as was believed, to attack that place; and that the *Venetian* Forces in those quarters did therefore draw together to oppose him. The Provveditore General *Cornaro* is preparing for his departure to go and take possession of his Government of *Dalmatia*. This week was made a trial of several Fire-works invented by the Ingenier *Veltri*, which succeeded so well, that the Senate have given him a yearly Pension of 400 Ducats.

Vienna, March 17. An Officer arrived here yesterday from *Upper Hungary*, who says General *Caprara* was before *Monigatz* with 4000 Foot, 500 Horse, six Mortars, and as many pieces of Cannon for Battery; and that there was in the place a strong Garison, who seemed resolved to defend it to the last, having had fresh assurances of Relief from Count *Teckeley*; but if we may give Credit to the Advices we have as well from *Caschaw* as *Zolnocke*, he has promised them what he cannot perform; for though the *Turks* may be able to draw together from *Great Waradin*, and the Neighbouring Garisons, a Body of 5 or 6000 Men, to assist him for the succoring of that Fortress, yet being very narrowly observed by the *Imperialists*, who have their quarters on that side under the Command of Lieutenant General *de Mercy*, and Major General *Heusler*, they can no sooner begin to move (as they have more than once attempted during this Winter) but these will be ready to oppose them. The Heer *Grunckau*, the *Brandenburgh* Commissary, will part from hence to morrow, to return to *Berlin*, having finished the Commission he was sent hither upon; He has assured the Imperial Ministers, that the *Brandenburgh* Forces will be in *Hungary* by the 15th of *April*, which is confirmed by the Letters we have from *Berlin*; They will be 8000 fighting Men, besides a considerable number of Gunners and Fire-workers. We had a report here the last week, that the *Turks* being very much dissatisfied with *Teckeley*, had carried him back to *Belgrade*, to keep him there, till they had the Grand Signior's farther Orders concerning him; but the last Letters from *Upper Hungary* make no mention therof, but on the contrary say, that according to the freshest News they had of him, he was still at *Great Waradin*, having with him about 800 *Hungarians*, who have returned to him since his Liberty. The Viceroy of *Croatia* has had this week several Conferences with the Prince of *Dietrichstein*, President of the Chamber of *Gratz*, and other of the Emperor's principal Ministers, with whom, it's said, he has concerted the matters he came hither about, concerning the Forces that are maintained by that Countrey for the Emperor's Service, so that it's believed he will now in few days return to his Government; The Marquis *de Parella*, who has a Regiment in *Croatia*, is likewise on his departure. General *Caraffa* has sent an account hither, That he has received for Contributions from the City of *Debrecen* 200000 Florins, and 1000 Sacks of Corn; And that the Bassa who commands the *Ottoman* Forces on the other side of the *Teisse*, has had the Title of Serasquier conferred upon him by
